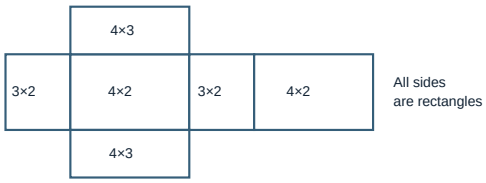
Reference package: Box A: 4 cm long, 3 cm wide, 2 cm high. Box B: 5 cm long, 2 cm wide, 2 cm high. Net shows all six faces for Box A; a surface plan does not include glue/tape allowance unless specified.



1. Label the area of EACH of Box A's six net faces (write the pair, multiplication, and square centimeter units).

2. Calculate total outside area for Box A in cm² by grouping equal pairs. Show all your arithmetic.

3. Calculate the outside area of Box B in cm² using its six faces; state which box needs MORE paper.

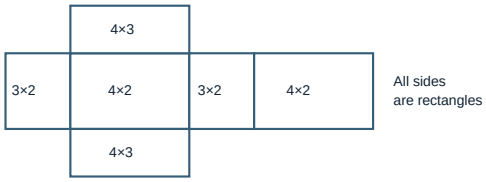
Reference package: Box A: 4 cm long, 3 cm wide, 2 cm high. Box B: 5 cm long, 2 cm wide, 2 cm high. Net shows all six faces for Box A; a surface plan does not include glue/tape allowance unless specified.



4. Explain why the volume of Box A is 24 cm³ but its surface area is 52 cm². Use the words *inside* and *outside* accurately.

5. A gift wrapper needs 8 cm² EXTRA for overlapping paper on Box A. Calculate the new paper total and identify why you added 8 instead of multiplying every dimension.
