# Data Detective: Which Day Was Typical?

**Tracking #: 2026-11-14-EMM-MATH-READING-DATA-47**

**Invented school library lending records; all numbers are practice data**

| Day | Room A checkouts | Room B checkouts |
|---|---|---|
| Mon | 8 | 9 |
| Tue | 12 | 10 |
| Wed | 10 | 12 |
| Thu | 14 | 10 |
| Fri | 6 | 9 |

1. Add all five Room A daily counts. Write your complete addition and the total number of books. Check it by grouping two pairs.

2. Add all five Room B counts. Find its five-day mean. Show total divided by five and give the unit books per day.

# Data Detective: Which Day Was Typical?

**Tracking #: 2026-11-14-EMM-MATH-READING-DATA-47**

**Invented school library lending records; all numbers are practice data**

| Day | Room A checkouts | Room B checkouts |
|---|---|---|
| Mon | 8 | 9 |
| Tue | 12 | 10 |
| Wed | 10 | 12 |
| Thu | 14 | 10 |
| Fri | 6 | 9 |

3. Calculate Room A’s mean with an equation. Then compare the two means in TWO complete sentences naming the week.

4. Find each room’s range. Show highest minus lowest for BOTH rooms, label books, and explain what a larger range means.

**Tracking #: 2026-11-14-EMM-MATH-READING-DATA-47**

**Invented school library lending records; all numbers are practice data**

| Day | Room A checkouts | Room B checkouts |
|---|---|---|
| Mon | 8 | 9 |
| Tue | 12 | 10 |
| Wed | 10 | 12 |
| Thu | 14 | 10 |
| Fri | 6 | 9 |

5. A student says ’Room A always lends more books because Thursday was high.’ Use TWO other days to correct the claim with evidence.

6. Write a four-sentence school report: each room’s total, a comparison of their means, and ONE limit of what this five-day table tells us.
