Clean Hands, Clean Station: A Real Safety Check

Tracking #: 2026-11-13-EMM-HEALTH-HANDWASH-46

Safe handwashing and no-food prep checklist (based on CDC clean/separate guidance)

Order	Action
1	Wet hands + add soap
2	Scrub every surface at least 20 seconds
3	Rinse and dry with CLEAN towel
4	Keep used cloth / dirty objects separate
5	Check counter and measuring tools before work

1. Actually wash hands safely. Record the actual scrub seconds, which areas you rubbed, how you rinsed and what you used to dry. Ask an adult for help if the sink/soap is not available.

2. Draw a labelled sink-and-counter setup with separate ’CLEAN TOOLS’ and ’USED ITEMS’ zones. Add four objects and explain which side each belongs on.

Safe handwashing and no-food prep checklist (based on CDC clean/separate guidance)

Order	Action
1	Wet hands + add soap
2	Scrub every surface at least 20 seconds
3	Rinse and dry with CLEAN towel
4	Keep used cloth / dirty objects separate
5	Check counter and measuring tools before work

3. A student scrubs for 7 seconds, dries on a used dishcloth, then handles a cup. Identify TWO steps that must change; write the corrected order and reason.

4. Write a before/after checklist for ONE real no-food surface inspection. Mark what you observed vs what you only imagined; do not report a surface cleaned unless it was actually cleaned.

Clean Hands, Clean Station: A Real Safety Check

Tracking #: 2026-11-13-EMM-HEALTH-HANDWASH-46

Safe handwashing and no-food prep checklist (based on CDC clean/separate guidance)

Order	Action
1	Wet hands + add soap
2	Scrub every surface at least 20 seconds
3	Rinse and dry with CLEAN towel
4	Keep used cloth / dirty objects separate
5	Check counter and measuring tools before work

5. Three safe-or-unsafe moments: before mixing water, after taking out trash, and after touching a shared phone. For EACH, explain whether to wash and why.

6. Write a six-step kid-friendly safety guide for tomorrow’s no-heat measuring station.
Include handwash timing, clean tool placement, one no-cross-contamination rule and your actual handwash observation.
