Tote Bags: What Repeats, What Is Extra?

Tracking #: 2026-11-13-EMM-MATH-TOTES-46

Fictional club supply table

Order	Bags	Items INSIDE each bag	Items OUTSIDE all bags
Blue	4	3 pencils	2 loose erasers
Green	4	3 pencils and 2 erasers	none
Red	5	2 markers	3 loose markers
Gold	6	2 pens and 1 eraser	4 loose pens

1. Draw ALL four Blue bags and put the exact pencils inside each. Draw two loose erasers in a separate area labelled 'outside, counted once.' Write the expression and total. Circle the TWO extras, not eight.

2. Draw ALL four Green bags. Put three pencils and two erasers INSIDE every bag. Write an expression using parentheses and the total. Explain why the Blue and Green totals are different.

Fictional club supply table

Order	Bags	Items INSIDE each bag	Items OUTSIDE all bags
Blue	4	3 pencils	2 loose erasers
Green	4	3 pencils and 2 erasers	none
Red	5	2 markers	3 loose markers
Gold	6	2 pens and 1 eraser	4 loose pens

3. Use the Red row: draw the five bags and the three loose markers only ONCE. Write the matching expression and total. State how you checked the drawing.

4. A friend says Blue means 4 x (3 + 2) = 20. Write THREE sentences identifying what the friend repeated by mistake and giving the correct drawing instructions and total.

Tote Bags: What Repeats, What Is Extra?

Tracking #: 2026-11-13-EMM-MATH-TOTES-46

Fictional club supply table

Order	Bags	Items INSIDE each bag	Items OUTSIDE all bags
Blue	4	3 pencils	2 loose erasers
Green	4	3 pencils and 2 erasers	none
Red	5	2 markers	3 loose markers
Gold	6	2 pens and 1 eraser	4 loose pens

5. Work the Gold row without guessing. First calculate one bag’s contents, then calculate six bags, then add the four loose pens. Write one exact expression and its total.

6. Create TWO tiny new stories with five bags and one loose extra: one story where the extra is outside ALL bags and one where an extra is inside EACH bag. Draw both, write expressions, and explain their different totals.
