Fictional garden plans

Garden	Length	Width
Herb bed	9 ft	4 ft
Flower bed	7 ft	6 ft
Path inside flower bed	2 ft	6 ft

1. Draw and label the herb bed as a rectangle. Write an addition sentence for the full perimeter, in feet.

2. Calculate the herb bed area in square feet and explain why the units are different from the border units.

3. Find the full perimeter and area of the flower bed before the path is added. Label both units.

Garden Paths: Perimeter and Area

Tracking #: 2026-11-11-EMM-MATH-GARDEN-LAYOUT-44

Fictional garden plans

Garden	Length	Width
Herb bed	9 ft	4 ft
Flower bed	7 ft	6 ft
Path inside flower bed	2 ft	6 ft

4. Find the path area and then the flower-planted area that remains. Show subtraction and units.

5. One roll of edging contains 20 ft. Decide whether one roll covers the herb bed border; state exactly how many feet are missing or extra.
