Engineer a Paper Rocket: Fins vs No Fins

Tracking #: 2026-11-11-NAT-PROJECT-STRAW-ROCKET-44

Real build: compare rockets with and without fins

Materials	**Paper, tape, pencil, scissors, straw**
Test	3 launches per rocket
Measure	Feet from marked line
Video	Science Buddies Paper Rockets

1. Draw and label both finished rockets. Identify nose, open base, body and fin placement. State ONE controlled design difference.

2. Record three actual flight distances for rocket A (no fins) and calculate its mean in feet.

3. Record three actual flight distances for rocket B (fins) and calculate its mean in feet.

Engineer a Paper Rocket: Fins vs No Fins

Tracking #: 2026-11-11-NAT-PROJECT-STRAW-ROCKET-44

Real build: compare rockets with and without fins

Materials	**Paper, tape, pencil, scissors, straw**
Test	3 launches per rocket
Measure	Feet from marked line
Video	Science Buddies Paper Rockets

4. Compare mean distances numerically, then record whether either design tumbled or remained pointed forward.

5. Write a three-part conclusion: observed result, exact trial evidence, and one uncertainty or improvement for a fair repeat test.
